

AW Technologies Press Release / 19.03.2026

AW Technologies and Val-Tech Healthcare announces they have entered into an exclusive distribution partnership for TrachFlush™ in Kuwait

Nørresundby, Denmark / Lancaster, England, United Kingdom – AW Technologies, a company focused on developing and bringing to market disruptive and innovative airway solutions for mechanically ventilated patients, and Val-Tech Healthcare, a UK-based private medical technology company focused on advancing healthcare through innovation, manufacturing, and strategic distribution of medical devices and solutions, announces today they have entered into an exclusive distribution agreement for the TrachFlush™ device in Kuwait.

Val-Tech Healthcare will act as the primary and exclusive partner for TrachFlush in Kuwait, and intends to appoint its sister-company, Medvision, as sub-distributor to carry out the commercial activities.

Invented by Alberto Zanella, an Italian intensivist, and developed by AW Technologies, TrachFlush™ is a medical device that maintains the tracheal tube cuff's pressure, preventing subglottic secretion microaspiration, and removes the secretion below the cuff and above (subglottic) the cuff non-invasively, lightening the workload for healthcare professionals and reduced patient discomfort.

The TrachFlush™ Device

When the Flush button is pushed, TrachFlush automatically synchronizes with the ventilator, and deflates the cuff during the inspiratory cycle, utilizing the airflow of pressure from the lungs and the ventilator to “push” the secretions from above and below the cuff up into the mouth of the patient. TrachFlush re-inflates the cuff again prior to the expiratory cycle, avoiding PEEP loss.

Illustration of removing secretions with TrachFlush

“The collaboration is built on a shared commitment to clinical excellence, innovation, and high standards. Through this partnership, both organizations aim to strengthen access to advanced

critical care solutions while ensuring consistent service quality and long-term value for healthcare providers”

DR. NOUR SULTAN

General Manager of Val-Tech Healthcare Limited

“We are proud to announce our partnership with Val-Tech Healthcare to bring TrachFlush to the Kuwait market. This collaboration will help healthcare providers deliver safer, more effective airway management and ultimately enhance the quality of life for patients on mechanical ventilation”

MR. ADAM HANSEN

Chief Executive Officer of AW Technologies ApS

About Val-Tech Healthcare

Val-Tech Healthcare Limited is a UK-based private medical technology company focused on advancing healthcare through innovation, manufacturing and strategic distribution of medical devices and solutions. It serves as a bridge between cutting-edge medical technologies and key global markets—with particular strength in GCC market access and regulatory support—helping partners expand their products across the Middle East. The company also engages in private-label production of high-quality single-use medical devices and supports growth of emerging medtech ventures.
