

AW Technologies Press Release / 20.04.2026

AW Technologies and Central Medical Supplies announce they have entered an exclusive distribution partnership for TrachFlush™ in the United Kingdom

Nørresundby, Denmark / Leek, England – AW Technologies, a company focused on developing and bringing to market disruptive and innovative airway solutions for mechanically ventilated patients, and Central Medical Supplies, a company specializing in supplying comprehensive, exciting, and innovative medical devices and ancillary technical services to the NHS and private sector acute care hospitals, announced today they have entered into an exclusive distribution agreement for the TrachFlush™ device in the United Kingdom.

Invented by Alberto Zanella, an Italian intensivist, and developed by AW Technologies, TrachFlush™ is a medical device that maintains the tracheal tube cuff's pressure, preventing subglottic secretion microaspiration, and removes the secretion below the cuff and above (subglottic) the cuff non-invasively, lightening the workload for healthcare professionals and reduced patient discomfort.

The TrachFlush™ Device

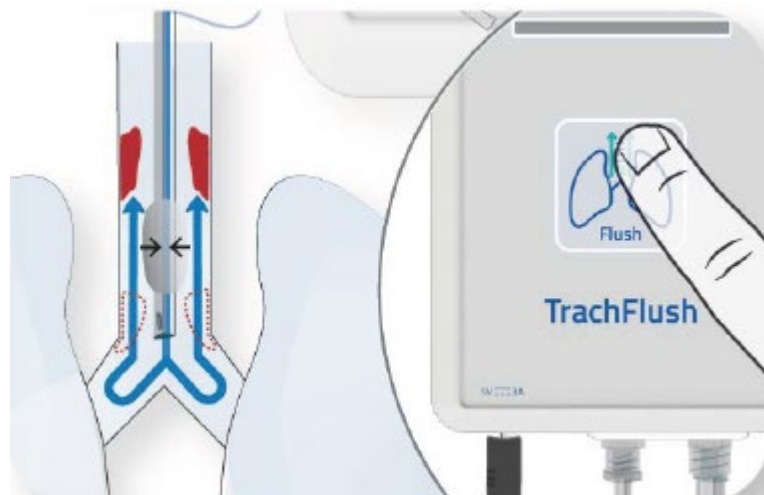

Illustration of removing secretions with TrachFlush

When the Flush button is pushed, TrachFlush automatically synchronizes with the ventilator, and deflates the cuff during the inspiratory cycle, utilizing the airflow of pressure from the lungs and the ventilator to “push” the secretions from above and below the cuff up into the mouth of the patient. TrachFlush re-inflates the cuff again prior to the expiratory cycle, avoiding PEEP loss.

“Central Medical Supplies is delighted to be representing TrachFlush here in the UK. TrachFlush offers tracheal secretion removal, which is proven to help prevent Ventilator-Associated Pneumonia, and also protects patients from tracheal injuries. The product provides invaluable benefits, both to staff workflow and patient outcomes. This partnership will further enhance our product offering to the NHS and private sector acute hospitals.”

MS. TRACEY PAVIER-GRANT

Managing Director at Central Medical Supplies

“AW Technologies is delighted to announce that Central Medical Supplies will represent TrachFlush™ in the United Kingdom. Together, we are making this important airway management solution available to clinicians, helping advance patient care and respiratory safety nationwide.”

MR. THEIS THOMSEN

Regional Sales Manager, EMEA & Indian Subcontinent at AW Technologies ApS

About Central Medical Supplies

Central Medical Supplies Ltd. (CMS) is a family-owned company established in 1989 by Philip Champ, who continues to lead the organisation as Chairman today.

For more than 35 years, our Staffordshire-based team has expanded and evolved our portfolio to deliver an innovative range of medical devices and support services to NHS and private acute hospitals across the UK.

Recognised for our expertise in critical care and neonatal equipment, we manufacture the internationally adopted Swabsafe™ swab-management system and the AXifeed® range for neonatal care.

At CMS, we remain committed to continuously advancing our product offering to ensure healthcare providers have access to the most up-to-date medical technologies and solutions.
